TECHNICAL INFORMATION SHEET

BACTOTREAT

PRODUCT DEFINITION: Non-Hazardous fracturing, gas pipeline and drilling operations corrosion inhibitor.

CHEMISTRY: Proprietary polymeric formulation, fresh and brine water soluble.

USAGE: BACTOTREAT is designed for use at a rate 1 gallon per 100 barrels of circulated, fracturing and/or produced water per day in production operations and 5 gallons per tour under normal operations and “as needed” to inhibit solids accumulation and act as an antifoulant.

PRODUCT ADVANTAGES:

- 1) BACTOTREAT is an environmentally friendly formulation that can be utilized in almost any circumstances.**
- 2) BACTOTREAT is non-toxic and mildly foaming unlike most competitive solids control agents that are hazardous and dangerous to not only the environment but to truck drivers and other rig personnel that must handle these products.**
- 3) BACTOTREAT requires no special Department of Transportation (DOT) transportation documentation or on-site placarding or special personnel protective clothing or gear.**
