

SF-325

STRENGTH ADDITIVE

<u>Description</u>	SILICA FLOUR 325 is ground silica sand used to stabilize the strength and permeability of cement for use at temperatures above 230°F (110°C).	
<u>Properties</u>	Form: 325 mesh graded silica sand Odor: None Bulk Density: 40 lb/ft ³ (untapped) Absolute Volume: 0.046 gal/lb.	Color: White Particle Density: 2.63 Water Solubility: Insoluble Water Requirement: 40% by weight of Silica Flour 325
<u>Application</u>	SILICA FLOUR 325 can be used in applications where bottom hole temperature ranges from 230°F to 700°F and at concentrations from 35% to 100% by weight of cement.	
<u>Compatibility</u>	SILICA FLOUR 325 is compatible with all API oilwell and ultra fine cements.	
<u>Handling/Storage</u>	Store in a dry area. Avoid contact with eyes, and avoid creating and inhaling dust. Use with adequate ventilation. See Material Safety Data Sheet (MSDS) for handling and hazard data.	
<u>Packaging</u>	SF-325 is shipped in 50 lb bags.
